AMENDMENT

In response to the Office Action mailed November 7, 2000, please
amend the above-identified application, without prejudice, as follows:

In the Claims:

Please amend claim 32 as set forth below:

32. (Twice Amended) An electronic still camera for
initiating capture of a still image while previewing motion images on a display,
comprising:

- (a) an image sensor having a two-dimensional array of
photosites covered by a mosaic pattern of color filters including at least three
different colors for capturing images of a scene, each captured image having a
first number of color pixel values provided in a first color pattern;
- (b) motion processing means for generating from the captured
images, a second number of color pixel values provided in a second color pattern
